Melbourne & Victoria Web TV, AUSTRALIA

...a different sort of TV!

Monday Nights from 8:00pm AEST

Introducing MELfeed.video!

MELfeed.video is a new Web TV Service for Melbourne, Australia. Our service features new and old Community TV Programs and other video content from time to time. Programming is presented at least one night a week (currently Monday nights) to start with, via Live Streams on YouTube Live, and the broadcasts will be available for replay soon after. The website will also showcase some on demand programs and content from the owner of the site and the participating Community TV groups, whether that is via our own YouTube, or other accounts associated with those programs. The aim is to provide a service to promote some of the lesser known community TV programs, past and present, on C31 Melbourne. These programs tend to not get much promotion on the station!

Initial programs on this service will be drawn from the libraries of Northern Access Television (NAT) and Melbourne East Television Regional Organisation (METRO TV). Other program providers that wish to join with our web TV service can ask us to consider their programs to be included as part of the service. Sometimes serious, sometimes playful, these programs will find a “second” home here on MELfeed.video! – The service is owned and operated by Michael Costello (who trades as VideBus) and participation in the service by programs and providers will be at his sole discretion.

Would you like your program on MELfeed Video?

MELfeed Video is always interested in the possibility of adding new (or old) programs to the service. If you are interested in having your program added to the service, please contact Michael Costello by email - michcos@optusnet.com.au . We are hoping that in the near future, some programs from the METRO-TV group may join the service. We are also always looking for Community Service Announcements and Promos, etc, and short promotional videos for Community Groups. If you have something you would like to submit, get in touch. NOTE: - We are not in a position to pay for content, but by the same token, do not charge producers for the service either!

Transports of Distant Delight

Transports of Distant Delight is currently the final program on MELfeed Video's streams each Monday Night. Featuring a wide variety of Transport and Travel related short videos and slides, John Stewart has made around 34 episodes in his special series for MELfeed, of which we are roughly half way through using the episodes. Running for 15 minutes, and set to appropriate music from the YouTube music library, it is a nice way to wind down after watching our other programs on the streams. Take a look from 10:30pm AEST each Monday night!
